### Chemical resistance of common metals used in valves.

The information in these tables is offered as a general guide only to the chemical resistance of commonly used materials in the construction of METAL valves.

These tables are not to be used as an absolute recommendation as there are too many factors that can influence the corrosion resistance, such as temperature, temperature fluctuations, concentrations and solutions, velocity and abrasion. Allvalves Online Ltd therefore accept no responsibility for any problems arising from use of these tables.

We recommend that if any doubt exists as to the resistance of a material to a specific chemical, that tests be carried out to verify the compatibility.

### What the ratings mean:

Ratings are based on media at ambient/ room temperature unless otherwise stated.

A = EXCELLENT RESISTANCE

B = GOOD OR ACCEPTABLE RESISTANCE

C = POOR RESISTANCE

D = DO NOT USE, NO RESISTANCE

## Chemicals

	Aluminum	Brass	Carbon Steel	Ductile Iron / Cast Iron	316 Stainless Steel	17-4PH	Alloy20	Monel	Hastelloy C	Buna N (Nitrile)	Delrin	EPDM/EPR	Viton	Flexible Graphite	Teflon-Reinforced

## Chemical Compatibility - Metal

[www.allvalves.co.uk](http://www.allvalves.co.uk)

Speak our technical sales team today about the valve that is most suitable for your application. Our experienced valve team can offer all types of valves in a wide range of materials and seats and seals, liners to ensure 100% suitability for your requirement.

From metal and plastic ball and butterfly valves to lined valves and exotic alloys such as Titanium.

Wide range of Metal valves

Wide range of Plastic valves

Pipe & fittings in plastic or metal

Lined valves available
